

iPhone Photography Conference 2025 Q&A

PRECON DAY

10:45 B

iPhone Photography from A to Z | Rick Sammon and Susan Sammon

Good morning from the Bronx

Do you use additional lenses on your phone?

Yes, but Reeflex. I show them in my other class at the conference.

Bill from Hampton Va

Are you using default settings or modifying some of the settings?

It depends on the subject. I do both!

Gran

What safety strap do you use ?

I forget the name. There are a ton on Amazon.

Donato635

Is there a way to set the ratio 16:9 as my default?

To set 16x9 as the default aspect ratio for your iPhone camera, you can enable Creative Controls in the Camera settings. This will save the last used aspect ratio, filter, lighting, and depth settings.

DAY 1

11:00 A

iPhone Tips and Tricks | Scott Kelby

donato635

When I shoot in Live Mode in Photo, and change the depth, it will not change the depth if I choose a new frame to make Key Photo, only the original key photo. How do I blur the background when I choose a different frame to mark as Key Photo?

Unfortunately, one limitation is you can't the depth for anything other than the initial photo.

Michelle Cornejo Photography

I thought that utilizing studio lighting features immediately decreased our image from 48 to 24 megapixels. Is that correct?

It is my understanding that using the studio lighting effect does not effect the resolution of the image.

iPhone Photography Conference 2025 Q&A

Hutch

How large is the DNG file when using Lightroom camera?

I have no idea. Sorry 'bout that.

OmahaOne

What mode does it shoot when you take a photo from the video screen?

It shoots in standard mode, but only 12 megapixels.

Bryan Alaska

I notice my phone 16 Pro images are often blurry or not sharp. Even adjusting the sharpness doesn't do much. Any focus settings or tips.

They should be very, very sharp, so there's something wrong. The first thing I would do is clean your lenses with a microfiber cleaning cloth. If that doesn't immediately fix it, you need to take it to your local Apple store and have them fix it.

Sam Knutson Photography

While recording a video none of the buttons seem to take a photo for me what am I missing? iOS 18.3.1 on iPhone 16 Pro and I will go back and watch the recording but this is a great tip and I can't make it work. Googling so far has not helped.

You have to take the still shot while you're recording the video – a white shutter button appears right on screen (it's smaller than the record button).

graypegasus

How do you change the type of lighting for a portrait after the shot was taken?

If you shot in Portrait mode, go to Edit then Tap the Depth Adjustment button, then drag the Portrait Lighting control to choose a lighting effect.

Shoutout Morgan Hill

With all these tips, do we still need to use Lightroom camera App or is the native iPhone camera App the best one to use?

I just use the native Apple camera App.

Rob

Any reason I don't see an image on camera remote on watch? I'm able to switch cameras on the phone but don't see the image on the watch face. I am on a 15 Pro running 18.3.1.

When you take the photo using the watch App, a tiny square appears in the bottom left corner of your watch after you take the shot. Tap on that to see the image on your watch face.

Mike from Islamorada

What are your thoughts on high res HEIF in lieu of RAW. Thanks.

I just use the RAW photo. The high res HEIF is still a form of JPEG, so I prefer just the RAW.

iPhone Photography Conference 2025 Q&A

Anne

What does the "spatial" option on iPhone 16 Pro max mean?

That's for capturing images to use on the Apple headset.

Neenie

Should you shoot group photos in portrait mode?

That's up to you – as long as everybody is on the same horizontal plane it should be fine. If you have multiple rows of people, it's possible the folks in rows further back might be blurred, but you would see that before you took the photo

Anne

What is the "mirror front" option ?

It flips the camera so instead of seeing a backward mirror image (like you see in a real mirror), it flips it so it's not a mirror, but normal view.

Lydia

Great presentation! I am a newbie, and I have an older phone. Can you recommend a reference for best use of older iPhone camera? iPhone 7 Plus

Just make sure you're using the latest iOS version you can, and you'll have most of the features (but not all), that you saw in the class.

Alison

I am on a 15 Pro Max with up-to-date iOS there are some things you showed us which I can't do. Is that because you have a 16 Pro??

There are very few things you can't do – mostly it's just the Camera Control button you don't have, which isn't that great a feature anyway. It's pretty lame, actually.

DrD

iPhone 16 RAW max @2x and 5x the res is only 12mp where as 1x 48 mp what gives?

It's not available for every lens, unfortunately. It's a limitation.

Can you disable the zoom wheel? Is there a way to turn off the digital zoom wheel?

Not that I know of.

Heidi From Michigan

Do you have any influence to Apple to ask if they can send a reminder that RAW is on? Either with # of photos taken or time? I've been caught in RAW when I didn't want to have RAW! Thanks, good class!

I have absolutely zero influence at Apple. LOL

Anne

Scott what is the spatial bar on new iPhone..?

It's for using with the Apple headset.

iPhone Photography Conference 2025 Q&A

11:00 B

Unleash Your iPhone's Power for Stunning Portraits! | Tracy Sweeney

km

Can I modify the style as shown in the talk on an iPhone 13 Pro?

Yes, but not with the unlimited options you saw today. You will find photographic styles on older models and you can choose from: Rich Contrast, Vibrant, Warm, or Cool— then customize them further by adjusting the tone and warmth values... essentially, filters.

12:15 A

You took THAT with Your iPhone??? | Glyn Dewis

Bill from Hampton Va

Is there a downloadable handout showing all the gear, filters, Apps that Glyn uses with his iPhone shots?

If it helps Bill, I list what I use in the 'mobile' tab over on my website glyndewis.com

Bryan Alaska

The iPhone has burst mode if you press shutter and slide left. Is there a benefit in image quality from using Moment?

I do use the Burst Mode in the iPhone App. Using it in the Moment App because I can use the App to independently lock focus and exposure (unlike in iPhone App) plus access to other manual settings.

Bryan Alaska

The Apple watch 8 will do burst mode of (10) images if you set it to timer.

That's great ... thank you for letting me know, Bryan

ReeXpose exposure settings: Could you help my with an App Problem? I use the ReeXpose App in manual mode taking the ISO as low as possible, and I use both highlight clipping and the histogram for exposure control, but my images are consistently over-exposed. Bracketing has helped.

I'm afraid I don't know why that would be that case. You should be getting back an exposed picture with the frames having been averaged to create the long exposure. Certainly not overexposed.

good morning from San Diego

Can you please send a list of commonly used Apps and gimble for iPhone. Thanks.

I list Apps and hardware over on my website glyndewis.com in the mobile tab

Linda

What is the bracket you are using to attach the iPhone to the tripod?

Ulanzi ST-27 but now going to be using the "Phil" from 3 Legged Thing

iPhone Photography Conference 2025 Q&A

Bryan Alaska

Is there a course for using iPhone with Photoshop/Lightroom.

Hmmmm now there's a thought. I'll speak with the Team at KelbyOne.

RH from MI

What is the recommended minimum memory for the iPhone to use for RAW files, LR/PS, and the Apps you have on your iPhone?

To be honest, that all depends on a couple of things ... how active you are taking photographs and how organized you are at removing unwanted / unused image files. I have a 1TB iPhone. I use it a lot and am currently at 636Gb but could do with clearing some out.

Bryan Alaska

I think I missed it, are these RAW files or can we do it with jpg/heif

Not sure which part you mean Bryan but just to clarify I shoot RAW when out purposely taking photos with my iPhone. Mostly using 3rd Party Apps and adjusting manual settings so ending up with a 12MP DNG file.

DJ in Seattle, WA

What is the name of the grip you showed?

The ShiftCam Pro Grip

Trish & Jim

Where will we find the Apps, and Products you used in this course?

I list everything in the MOBILE tab on my website glyndewis.com

Hutch

Hi Glyn, why did you make two copies for your "Detail" work in Photoshop? You only modified the one layer. What role does the second layer play in the effect? Fantastic presentation.

The other duplicate, although unused is needed because of the blend mode changes. If only one layer was used, the blend mode would cause the layer to interact with the background layer and so Produce a different / unwanted result.

12:15 B

Making Films with your iPhone | Aundre Larrow

Doug M

How do you get the close water shots and waves with the iPhone? Is it in a waterproof case?

I filmed it with no case. If you do that though please consider a few things: 1. make sure you don't drop your phone a lot because that messes with the waterproof seal. 2. Use the camera control button or the volume button to film because once underwater the touch screen is a little finicky. 3) if you use an underwater case I recommend the [SeaPal Waterproof Case](#).

iPhone Photography Conference 2025 Q&A

Sangiao-photo-Madrid

I live in Europe where lights flicker is 50Hz but I sell STOCK footage: in which FPS will be better record for sell I stock? Which can be easy accommodate for different fps? 24fps but I could have Problems with flicker 25 fps but not use 30 fps to decelerate?

This is a good question, let me ask a DP I know and get back to you ASAP.

Doug M

What microphones are you using to record audio for your videos?

Good question, I love the Rode mic ii.

urbane

How do you use the hard drive? Connection, settings, what are file names, etc

Great question, plug the hard drive, open to files App and you can use the Black Magic App to settings, media, save clips to and select the hard drive.

Cindy SC

How do you prepare a storyboard? How much do you deviate from it?

I take time to write out each scene. After that I pull examples from films and television shows,

Debra M

So, you have to have Black Magic in order to record directly to the external drive? Can't be done from iPhone App? Thanks. Debra

It can be done with the iPhone App but only if it's in ProRes Log

Cindy SC

What is the name of the tool that you used to hold the phone? The piece that looks like a big frame.

It's a camera cage you can get it from Moment lens, that's my favorite one. They have a base cage or a filmmaker cage.

InspireMe

If you film video and pull still photos will the quality be as good as camera Portrait mode. What will the quality be like for the various options (4K or HD at Pro Res HDR etc.)

I don't think so, you're better off taking photos and videos separately. I don't know the exact specifics but generally capturing separately is the move.

iPhone Photography Conference 2025 Q&A

2:15 A

Edit Your iPhone Photos Like a Pro | Terry White

Jeannie

I like RAW 12. Does it only work in Photo?

It should work in Lightroom and Photoshop too

Doug Kea

Are you in Live mode when you shoot your iPhone photos?

Hardly ever.

Rose from Boston

If I already took a picture not in portrait, can I bring up portrait after the fact with editing. I do not see F on my editing? Also, I tend to bring my photos for editing in Lightroom classic--high bring in (I do not us mobile)

If the photo was taken before iOS 12.1 was released (October 2018), it won't have the adjustable depth control. Apple added the ability to edit the depth of field in post with this update.

Shoutout Morgan Hill

How do you manage your photos when some are in camera roll and some in Lightroom?

I Lightroom as the source of all important photos. I edit from the Camera Roll which copies them into Lr

Redlenzes

In Lightroom mobile, if I import a photo from my photo roll and edit it, are the edits Applied back to the photo in the roll?

No. It copies it into Lr and the edits are only Applied to that copy.

June Norsworthy

Hi Terry, I was following along, but I cannot see edit in Photoshop from the LR App. So, I downloaded PS for the Phone, but it still is not there. Can you Provide some guidance on how to find Edit in LR?

You definitely need the Desktop version of Photoshop to do this

Heidi From Michigan

I do not have a "Clean Up" button on my iPhone. I see the other options Adjust - Filters - Crop - but no "Clean Up" how do I get that?

It's a part of Apple Intelligence released in iOS 18.1 and only on iPhone models that have enough Processing power.

DJ in Seattle, WA

Do you shoot in Lightroom Camera? Why or why not?

Yes when I want more control over my settings.

iPhone Photography Conference 2025 Q&A

Sangiao-photo-Madrid

Does all the AI things that you did in Lightroom use AI credits for the account?

Yes, but Currently, we are not enforcing generative credit limits on standard features for users with Creative Cloud subscriptions. Once you hit your limit, you may experience reduced generation speeds.

good morning from San Diego

Is the Lightroom you are using is paid App or what it comes with phone itself

Lightroom and Photoshop are free downloads from the App Store. There are premium features for paid members.

Rose from Boston

Is this Lightroom App for iPhone, or is the Lightroom mobile. I have creative cloud subscription, which to get.

There is only one Lightroom for iPhone on the App Store.

Jeannie

Does Adobe Photography Plan include Photoshop mobile?

Yes and note that Photoshop is a free download.

2:15 B

Professional Portraits: Posing, Lighting, Workflows & More | Lisa Carney

Amelia

Does Lightroom Mobile or Apple editor perform different if your working with a Live Photo ?

Live photos are only JPG, you cannot capture in RAW. Edit wise its basically the same. It will ONLY take one frame. Hope that helps.

3:30 A

Capturing Landscapes: Every Setting & Accessory You Need |Ramtin Kazemi

urbane Chicago

For the long exposure, and combining 10 images in PS, what if you burst and there was more . my question is there a maximum number of pictures that it destroys itself or doesn't work?

No there isn't a maximum number BUT you do not want to do too many. Just use 10 or 16 max. It would be otherwise taking too much computing power and slow things down for no reason

iPhone Photography Conference 2025 Q&A

Bryan Alaska

My images look blurry or slightly smudged no matter tripod, lens cleaning etc. Is this a normal iPhone issue due its small lenses?

Could be a few different reasons for this. But I would definitely give my lenses a cleaning and try before jumping to any other conclusion.

Rose from Boston

These are very large files on your iPhone--how are you bringing them into your computer, if it is sitting in the native Program, or do you put it iPhone LR?

I usually connect my iPhone directly to the computer and use it as a "memory card" and import them directly to my Lightroom

Michael

I think there's also an option to do long exposure using the live mode instead of stitching photos together in PS? If so, does it do RAW and 48MP on a wide lens on an iPhone 14 Pro?

That would not be RAW. That's only JPEG

Bryan Alaska

My 16 Pro max allows me to select a Fusion camera and turn on or off the different lenses. Should that be toggled?

Yes I would keep the Fusion option on. As long as it's shooting RAW. That's all that matters :)

June Norsworthy

Great workshop Rammy. I was writing down the steps for getting smooth water after exporting to PS. What is the 2nd step after converting all 10 photos to a smart object.

You need to then go to Layers, Smart Object and select a stacking mode there. Either Median or Mean

4:45 A

Snap, Edit, Shine: Mastering iPhone Photo Editing Like a Pro! | Tracy Sweeney

Michelle Cornejo Photography

Question for Tracy: I am able to activate photographic styles with jpg file format, but I can only adjust it before I shoot. Is shooting in HEIC the only way to access the styles in post? Thanks!

Yes. Direct from Apple, "To edit Photographic Styles in the Photos App, Camera needs to capture photos with High Efficiency image capture."

iPhone Photography Conference 2025 Q&A

4:45 B

The Must-Have iPhone Photography Accessories | Jefferson Graham

Shoutout Morgan Hill

What happens if you use an ND filter and the native camera App?

Not much. The native App is all automatic.

SHARON

Can I know which selfie stick you use? Thank you.

Insta360

SK

Are we going to get a list of all these Products he has talked about?

Yes--I will put them together in my newsletter, which will be out on Saturday. The newsletter is free. <http://www.jeffersongraham.com>

DAY 2

11:00 A

Travel Photography with Your iPhone | Scott Kelby

SoCalMal

Do you use Photographers Ephemeris or any other light planning tool?

I do not.

Janice in Venice, FL

My iPhone 14 Pro Max does not have the word "live" at the top of the screen, however I do have the round Circle at the top. Is there a setting to get the word "Live" put on the screen?

The round circle is the most important thing, and the word "LIVE" in yellow only Appears for a few seconds when you tap the round circle to turn it on/off.

Pam C

Does iPad Pro have same features? And what do you do in terms of storage if shooting RAW etc. On you iPhone while on location or traveling? Thank you.

It does not have all the features, and the camera doesn't offer the same quality. It also does not shoot in RAW.

iPhone Photography Conference 2025 Q&A

Maggie's mumma

Will there be a short tutorial on how to navigate the even longer App?

Make sure you catch Erik Kuna's class today because he's showing Even Longer in his sessions. There are also YouTube video tutorials.

Sangiao-photo-Madrid

I just do Stock photography... for food also you recommend me to just cut the plate? And the copy space on the food texture?

The tips for composition I gave are for travel photography food shoots – there is Probably an entirely different set of criteria for shooting food stock.

Maggie's mumma

Also, when you shoot and RAW, it's harder to send these large megapixel photos in a text or in an email. Is there anyway around that or how do you change your files into something that can be sent?

I only shoot in RAW if I'm going to edit that photo on my desktop, and then save the resulting image as a JPEG for emailing or sharing. You'd need to save your RAW file in a JPEG format which is made for sharing.

Maggie's mumma

Is there a way to fix the perspective on the super wide lens?

Yes, but the controls are somewhat limited in Apple's Photos App. Lightroom on your phone can do a much more robust job. :)

Michael

How do you decide on what kind of trip to take your big camera or just the phone?

I usually take my big camera, but it often doesn't leave my hotel room, but I have it just in case some important shoot comes up – like I get access to somewhere special. On my recent trip around England, Scotland and Ireland, I used the phone more than my Canon R6.

Rose from Boston

How much do you edit in the camera, vs bringing back to LR classic? Do you transfer the large file photos via connection to SD and then to your computer? I use LR classic, and not LR mobile. Great talk thanks!

I only do light editing on the phone. I much prefer to edit my iPhone images in LR classic.

good morning from San Diego

I have 12 Pro Max ,is it worth buying the latest I phone

I would wait for the new one coming in September at this point.

iPhone Photography Conference 2025 Q&A

Jeanne W

What is best way to download iPhone photos to LrC?

If you turn on the feature that automatically imports all your iPhone photos in Lightroom on your iPhone, they will automatically sync back to LrC. :)

Bryan Alaska

My iPhone 16 Pro max has a RAW Max setting. Is that the 48mp image? Not too sure what it does.

Check out my class from yesterday where I go into the whole RAW thing: how to turn it on, which one to use, etc.

Mike from Islamorada

What is the name of the wallet tripod from Scott's Travel presentation?

That is the Pocket Tripod Pro.

Alison

Just to let you know Scott The pocket tripod has a life time guarantee. Mine cracked whilst it was in my rucksack. I sent them a photo of the damage and they sent me a new one, no quibbling. That's what I call an excellent service!

Holy cow that is great to know, because mine broke, too! I'll send them note. :)

Jeanne W

Using iPhone camera & then putting all photos in Lr. However, when I try to edit newer photos in Lr on my phone, messages pops up: "Photo failed to load. Editing is disabled....". I guess it's a setting in Photos that I need to adjust?

I'm thinking the image hasn't fully synced but I'm not quite sure why that is.

sgr

Hi Scott When would you use Pano and when the 0.5 lens? Especially in Pano, if you don't go too wide, they give similar effects. Thanks!!

The .5 lens pushes the scene away from you, and it creates distortion along the edges. The Pano doesn't, and you get a much higher resolution file.

11:00 B

Make the iPhone Your Main Camera | Rick Sammon

Linda in SC

Does the Reeheld case accommodate filters like a CPL or ND?

Here you go: <https://reflexstore.com/en-us/pages/lenses-filters-faq?srsId=Afm-B0orFdmHgdTTLFPRqGPhWmIKMbJxMFzz38kQbLyk5bjzujduMaggQ>

Bwanabambesa

Where to you store your pictures? Do you use something like a Lightroom catalog?

On a portable hard drive.

iPhone Photography Conference 2025 Q&A

Alex from Mukilteo WA USA

When I import from iPhone to Lightroom Classic, Lightroom brings in all my photos on my iPhone. They are in no order and it is very hard to find the actual photos I want to import. How can I get the pictures at least in chronological order.

I don't use that for importing and storage. I make Galleries on my phone, and then put my faves in folders on my computer.

12:15 A

Pocket Pro: Mastering iPhone Photography | Erik Kuna

Janice of Venice FL

Erik, What does the round circle in the upper left that has a crescent moon in it with horizontal lines do??

That's when your camera automatically picks up "Night Mode"

Bryan Alaska

Will you be going through camera App in settings a bit? I notice I take an image and it looks great for a few seconds then the AI crunches it blurry.

That's usually because the phone is Processing the image as a JPEG. If you want it flat for editing, shooting RAW will help.

Jill from Minn

Erik—Is there a cheat sheet with preferred camera settings and what each button does?

I don't have one yet, but I'm making one.

Chris

What was the name of the case that had the slider over the lenses?

It's a Torras but there's tons of them on Amazon, just search your model and the term "case with lens cover" so like "iPhone 16 Pro case with lens cover"

BajaJeff

Can you post the link to get the small holder and remote?

<https://geometrical-inc.com>

Janice of Venice FL

Erik, Please tell me how to find the timer?

Open Camera on your iPhone. Tap the Camera Controls button. Tap the Timer button, then choose 3s or 10s. Tap the Shutter button to start the timer.

Diana from Philly

Hi. Which of the Even Longer modes would you suggest for Aurora Borealis?

I'd try Night Mode or Light Trails mode. Honestly, I've never tried it with the phone, but you want to run maybe 10-15 seconds since you don't want too much movement or the Aurora will lose detail.

iPhone Photography Conference 2025 Q&A

gifoto san diego

Did not find any blur improvement with ReeHeld. What did I miss?

Reeheld stabilization that improves the blur automatically when handholding.

Granny

How do you handle the HDR button with LR Classic? It seems like I need to edit every iPhone picture now with this new HDR button. Am I missing something?

Hmm... I've never had that happen, I'll have to check it out.

Dude from Dubuque

How do I send my phone images to LRC rather than LR?

I just download them to my hard drive just like I would with a DSLR or Mirrorless. I plug in a USB-C cable and then use the image capture to transfer the photos to my photo storage drive.

Alex from Mukilteo WA USA

When I import from iPhone to Lightroom Classic, Lightroom brings in all my photos on my iPhone. They are in no order and it is very hard to find the actual photos I want to import. How can I get the pictures at least in chronological order?

If you sort by date taken in the library it should list them in that order.

Alison

Hi Erik, an inspirational talk as always. What tracker do you use with the iPhone

I use the Move Shoot Move NOMAD right now, super easy. <https://www.moveshoot-move.com/products/nomad-star-tracker-for-novice-and-experienced-astrophotographers?srltid=AfmBOogr0POhRkdMisNub-ch6R8KIGKRILqHGg55FRpGhCovh-P6u5vPz>

2:15 A

iCarography: Shooting Rides with an iPhone | Glyn Dewis

Doug M.

Does the ShiftCam Pro Grip work with the iPhone 16 Pro Max?

Yes, I believe so.

Sherrie

Are you using the iPhone 16 Pro max or the regular size phone?

I'm currently using the iPhone 15 Pro Max and eagerly awaiting the 17

David

Where do we go to get the Dark & Moody preset?

I'll have that with the Kelby Team for you to download when the recording is available. You can also grab it from my website. I don't charge for it.

iPhone Photography Conference 2025 Q&A

June Norsworthy

Hi Glyn, June here. I somehow missed the preset where the car image was in black and white with the red tail lights. Did you show that or did I just miss that entirely. I watched the rest of the LR flow, but I did not "get that preset".

Yeah I started off with it and then tweaked the settings. The preset will be available to download once the conference recordings are up. Hope that helps.

2:15 B

Vacation Storytelling | Lisa Carney

SoCalMal

What do you use for underwater shooting?

AxiOS Dome, B&H might have it , or an alternative case ;)

Doug Kea

I've never been one to think about shooting square shots, but you are changing my mind. Do you purposely setup a shot thinking it would look good square or it this usually done in post Processing?

I happen to use square format a lot. But I shot in 16:9, and crop in post. For the JUST in CASE

SoCalMal

Do you ever take a pocket photo printer to share pix with your subject?

GREAT IDEA!!

Mette Klint

Denmark

Clean-up button in photos App, if you don't have it why is that? Does it depend on the model iPhone you have, the iOS system or what? Yes, iPhone iOS.. Depends on the model you have

Susan

Our clients sign a photo release form, what do you do for folks you photograph whom you don't know. On vacation, on the street, local portraits? Yes, they give you permission, but can you now post them on social media? Sell them?

Traveling in non English speaking country makes this really tough. I do not sell images that someone's face is identifiable (spelling)

Maggie's mom

Is it possible to do slideshows in Lightroom mobile?

No, not that I know of. But I transfer all my LR heros to my iPhone camera roll

Janice of Venice Fl

Thanks Lisa, perfect Thanksgiving shots!

THANK YOU!

iPhone Photography Conference 2025 Q&A

Shannon in Texas

This it's not iPhone related, but I am wondering how Lisa has such great lighting on herself during her presentation without getting reflections and glare in her glasses. I wear glasses too, and I really struggle with reflections and glare.

Girl, I have one of my LED lights off to the side. I use WESTCOTT L60. email me lisa@lisacarney.com and I can send you info.

Nargo

Great information.....I never finish my photo books. I always become too self critical of the Product and just file it away. You have inspired me to stop that. Also..... where is this "magic wand" what you use on your editing. I can't find it.

LR mobile has QUICK ACTIONS if you have premium version. Email me if you have questions. lisa@lisacarney.com. AND print your books!!!

3:30 B

Capturing Landscapes: Post-Processing with Style | Ramtin Kazemi

Shoutout Morgan Hill

Ramtin, you're working in LRC; can you do all those same edits in LR (not the classic version)?

I was working in LR not LRC actually!

SoCalMal

If you still do light and color work but placed mountain using rule of thirds would it be better or worse?

I'm not sure I understand the question, placed mountain means what?

Janice of Venice FL

Is there a discount code from Adobe for LR Mobile?

I do not have one, Sorry about that!

4:45 A

Light It, Shoot It & Retouch It on iPhone | Terry White

DJ from Seattle

Which bluetooth remote do you recommend?

This one: <https://amzn.to/41q2Ovc>

Doug Kea

Terry, When using a colored backdrop, does the distance the model is from the backdrop change anything?

Yes, the further the subject is (8 feet is good) the more depth you'll see as well as less shadows.

iPhone Photography Conference 2025 Q&A

SoCalMal

How do you get rid of the under-eye bags?

Duplicate the layer in Photoshop. Remove them completely with the remove tool. Then lower the opacity to bring them back a little to taste.

Donato635

How do I soften skin in the Lightroom Mobile App?

Use negative Texture on a skin mask.

CK

If your iPhone battery is not good, how do you plan for a day of shooting especially when traveling? What accessories would you bring with you on the road?

I connect a portable Anker battery like this one: <https://amzn.to/4kp8Zby> or this one: <https://amzn.to/3F8tQQg>

Gail

Would it be better to buy a Pro max phone for editing? Is the max also a better viewfinder?

Only because it's a bigger display. However, personally I hate the bigger size.

Mike from Whidbey Island, WA

How do you download from your iPhone to an external drive?

Plug in your drive. Select the photos and tap Share. Chose the Files App and the destination as your Drive.

4:45B

How I Produce a TV Series on the iPhone | Jefferson Graham

Where can I purchase the Pocket Pro 360?

Do you mean Insta360? Try Amazon.
